

T&B® Electricians' Supplies

Wire Connectors and Termination Products

Introducing T&B Marrette® Wire Connectors

In 1914, William Marr invented the world's first pressure type wire connector. Since then, Marrette® connectors have become synonymous with "best quality wire connector". Easy to install and comfortable in the hand, they are indispensable to electricians. And now they're available as key components of Thomas & Betts' Electricians' Supplies product line. This is very good news for your fingers.

How good are they?

The first thing you'll notice about T&B Marrette wire connectors is that they come in a variety of types and styles, making it easy for you to identify wire size at a glance.

Feature for feature here's what makes Marrette connectors significantly better than other connectors.

- Marrette connectors are the ONLY wire connector to offer a non-winged, variable-volume live-action spring in the connector. The spring

expands to receive the conductors, rather than crushing them together, as typical non-winged competitors do.

- They can handle a broader range of wire connection combinations.
- They're coated with 100% pure copper, which reduces the corrosion common to tin and zinc-coated products.
- Marrette connectors' "finger friendly" design offers a truer grip for less hand fatigue during repeated use.
- They are the ONLY red non-winged connector that is U.L. listed for a pair of #8 awg wires.
- The high-grade polypropylene outer shell prevents "blooming" or "blossoming" of the connector sidewall. The outer shell maintains a constant moisture level, reducing the likelihood of the connector becoming dry, brittle, and subsequently cracked due to extreme heat or cold.

Marrette® XTP® (Non-Winged)

Cat No.	Wire Range*	Color	Min.	Max.

Wire Connectors and Termination Products

Marrette® Maxx™ Wire Connectors

The T&B Marrette Maxx is the “one wire connector” designed to accommodate over 95% of your wire connection needs in a single wire connector. The swept back ergonomic wing design gives improved leverage for easier installation. No special tools

needed and no pre-twisting of wires required. Whether you're installing minimum or maximum wire combinations, the T&B Marrette Maxx takes them on. “Don't be short ranged... take your wire connector needs to the Maxx!”

- Widest range single wire connector.
- U.L. Listed for combinations from #6 to 22 AWG.
- Copper coated live action spring.
- Finger friendly design makes connector easier to grip and turn.
- 600 volt rating gives you added confidence of installation on all wire connections.
- Swept back wing has excellent ergonomic design.

Marrette® Maxx™ 622

Cat No.	Description	Wire Range*	Min.	Max.	Std. Ctn.
Carton Packed					
622-P	Marrette Maxx	#6-22	4#22	1#6 w/1#10	1000
Carton Packed					
622-KP	Marrette Maxx Keg Pack	#6-22	4#22	1#6 w/1#10	5000

- Accommodates 14 to 10 AWG ground wires.
- Fulfills the need to ground wires with a U.L. listed connector.
- Accepts multiple ground conductors.
- Swept back wing design affords installer good leverage to make ground connections.
- Swept back wing creates less box fill.

T&B® Electricians' Supplies

Wire Connectors and Termination Products

The nylon insulating shells resist heat, cold and impact with a temperature rating of 105°C (221°F) max. Rated: 600 volt.

- Threaded brass inserts for vibration resistant connections.
- Easily removed.
- Color-coded nylon insulating shells.
- U.L. Listed and CSA Certified.

T&B Set Screw Wire Connectors

Threaded brass inserts provide vibration resistant connections that are easily removed for disconnection, visual inspection or rewiring. Thomas & Betts set screw wire

connectors feature flexible, color-coded nylon insulating shells, which are compact for tight applications.

Marrette® Set Screw Vibration Proof/Visible Connection

The Marrette® Set Screw is a two-piece, pressure type connector, featuring a solid brass insert with a screw-on insulating cap. It's the perfect choice when changing a motor, adding a circuit, conducting instrument testing or simply lashing-up temporary wiring.

External Cap

- Made of rugged, phenolic material and 150°C-rated.
- Insulator cap locks securely in place to safeguard against accidental loosening in high vibration applications.

Brass Insert

- Choice of slot or Robertson Set Screw.

When tightening into the insert, provides a solid pressure type connection on all approved wire combinations.

- No need to "re-strip" wires when re-wiring. Simply loosen set screw to remove non-twisted wires.
- CSA (LR6591), UL (424H) – approved for circuits up to 600V, and lighting fixtures and signs up to 1,000V.
- Convenient packaging – sized right and job-site ready!
